EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Steven M. Mills (Reg. No. 36,610) on 2/24/05.

The application has been amended as follows: In line 12 of claim 1, the phrase "an inverted predicted conditional branch" is changed to "an inverted version of the predicted condition branch".

2. The following is an examiner's statement of reasons for allowance: The prior art of record does not specifically teach or suggest, individually or in combination, a branch predictor comprising an accuracy history table for storing an accuracy history of the predicted branches and a multiplexer has an input for receiving a branch prediction and an inverted version of that branch prediction, where the appropriate prediction is selected based on a single selection signal, which is the most significant bit of a plurality of accuracy history bits for the branch instruction, in addition to all the other limitations of the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following reference is simply cited for use as a listed reference on the patent, once issued.

US Pat No 6,550,004 to Henry discusses the selection of a prediction based on a single confidence value, however Henry does not disclose an input to the selector or multiplexer that is the inverse of the branch prediction nor does he teach that the confidence is signal directly coming from the most significant bit of accuracy history bits.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shane F Gerstl whose telephone number is (571) 272-4166. The examiner can normally be reached on M-F 6:30-4:00 (First Friday Off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eddie Chan can be reached on (571) 272-4162. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
